

1 CLIP ON BED MOUNT

Clip the bed mount onto the end of the EuroLoft frame, ensuring the bed straps are positioned in between the bed frame slots.

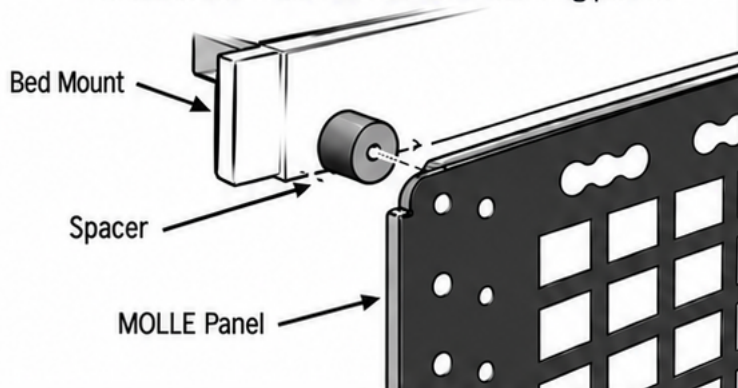

2 POSITION GEAR WALL

Take the EuroLoft MOLLE panel gear wall and position it to the adjustable height you want.

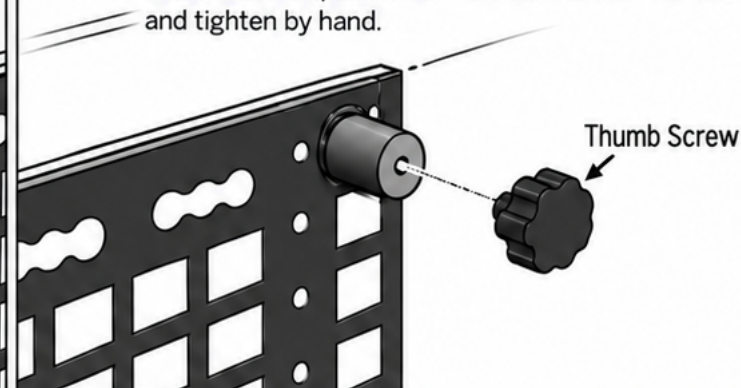

3 INSTALL SPACERS

Place the spacers between the MOLLE panel and the bed mount at the four mounting points.

4 SECURE WITH THUMB SCREWS

Insert the four thumb screws through the MOLLE panel holes, into the spacers and threaded holes in the bed mount, and tighten by hand.

5 COMPLETE

Raise the MOLLE panel to the top of the bed frame and secure the four thumb screws. Your EuroLoft MOLLE panel gear wall is installed and ready to use.
